Naturally curios and analytical, looking for entry-level job as data analyst. Self-taught, disciplined and responsible, for the past 9 month I worked with data in Python and SQL, made visualizations and predictive models.

Education

- Shahrood University
 - Bachelor of Electrical Engineering

Certificates

- Stanford University & Deeplearning.ai on Coursera Machine Learning
 - Regression and Classification Models (Linear, Polynomial, Logistic Regression)
 - Neural Network, Decision Trees, K-Means Clustering, Anomaly Detection Algorithms
 - Recommender Systems(Collaborative Filtering Algorithm and Content Filtering)
 - Evaluation of Models Performance(underfit, overfit using train, test, cross validation)

Skills

- SQL
 - Retrieving data using SELECT FROM WHERE statements
 - Using JOIN ON to combine multiple rows
 - Using UPDATE, ALTER TABLE to change data in database
- Python
 - Familiar with Numpy, Pandas, Sklearn, Matplotlib, Tensorflow libraries
 - Familiar with Jupyter Notebook
- Excel
 - Familiar with using pivot tables
 - Using functions
 - Graphs and Dashboards
- Statistics
 - mean, mode, median, standard deviation
 - Familiar with Normal Distribution
- Git
 - Initializing, stage, commit
 - push to GitHub

Projects

- Data Cleaning using SQL (Nashville House Prices)
 - Changed date format of SaleDate column using ALTER TABLE
 - Populated missing values for PropertyAddress using JOIN ON (self join)
 - Extracted City column from PropertyAddress using SUBSTRING function
 - Removed duplicates with the help of CTE and ROW_NUMBER()

Language

- English (fluent)
